

TOURMALINE

Tourmaline Bio to Host Expert Webinar on Human Genetic Validation for IL-6 Inhibition in Cardiovascular Disease with Dr. Dipender Gill on Friday, November 1, 2024

October 15, 2024

NEW YORK, Oct. 15, 2024 (GLOBE NEWSWIRE) -- Tourmaline Bio, Inc. (Tourmaline) (NASDAQ: TRML), a late-stage clinical biotechnology company developing transformative medicines to dramatically improve the lives of patients with life-altering immune and inflammatory diseases, announced today that it will host a webinar, *Understanding the Genetic Validation for IL-6 Inhibition in Cardiovascular Disease*, featuring Dr. Dipender Gill, CEO and Founder of Sequoia Genetics. The webinar will be held on Friday, November 1, at 9:30 AM ET and will explore the latest advancements in leveraging human genetics to inform therapeutic strategies targeting IL-6 signaling pathways.

Dr. Gill, a leader in leveraging human genetic evidence to inform drug discovery and development, will share how human genetic insights are advancing IL-6 inhibition strategies and guiding new approaches for treating high-risk cardiovascular patients. With over 250 published papers and significant contributions to Mendelian randomization research, Dr. Gill is recognized as a leading voice in translating genetic data into actionable therapeutic strategies. As cardiovascular disease remains one of the leading causes of morbidity and mortality globally¹, there is an increasing need for innovative approaches that go beyond traditional treatments. This webinar will explore how these advancements are reshaping the understanding of cardiovascular disease biology and opening avenues for more precise, targeted treatments.

To register for the webinar, please click [here](#) or visit the "Events and Presentations" section of the Tourmaline Bio website at <https://ir.tourmalinebio.com/events-presentations/events>.

A replay will be archived on the Tourmaline Bio website following the event.

About Tourmaline Bio

Tourmaline is a late-stage clinical biotechnology company driven by its mission to develop transformative medicines that dramatically improve the lives of patients with life-altering immune and inflammatory diseases. Tourmaline's lead asset is pacibekitug (also referred to as TOUR006).
